THIS IS UNCLASSIFIED INFORMATION

1. The ore mill Object Bruenlasberg was in full operation. The military labor units worked in two shifts of 80 men each from 0800 to 1400 hours and from 1400 to 2000 hours. In addition to the soldiers, there were about 20 Soviet civilian engineers employed and, on a temporary basis, 8 to 10 German skilled civilian laborers who had special passes for the Object and were also employed by other Objects. The processed ore was packed in impregnated cardboard drums and sent by truck to the Aue railroad station where it was loaded in boxcars. Each truck with ore leaving Object Bruenlasberg was escorted by one guard with red bordered black epaulets who was armed with a rifle.
2. Recently, the ore processed by Zeche 99, the former Blaufarbenwerk in Oberschlema, was shipped to Bruenlasberg Object for further processing. Zeche 99 processed less rich ore in a so-called thickening process, loaded the ore in mine cars on trucks, the cars on one truck, and shipped it to the Bruenlasberg Object where the ore was dried electrically and packed in drums like the other ores processed at the mill. With the ore from Zeche 99, five types of ore were processed at the Bruenlasberg ore mill.

25X1

New vehicles were not observed.

 Comment. Zeche 99 is the ore dressing plant of Object 99. Shipments of enriched uranium ore from Object 99 to the Bruenlasberg object were reported for the first time. It is believed, however, that this ore is merely packed and dispatched at Bruenlasberg and not, as reported, further processed.
